GEOMETRIC CAGE SEMI-FLUSH LIGHT

SHFFELHL003

DESCRIPTION

This Geometric Cage Semi-Flush Light mounts to the ceiling on a canopy with a dark finish and a short drop rod that brings a square geometric cage frame down from the ceiling surface with an inner frosted glass panel visible through the cage panels. At 14 inches square and 10 inches overall drop, it suits design-forward hotel entrance ceilings, boutique hospitality lobby corridor positions, and feature ceiling lighting installations where a geometric cage semi-flush delivers a structured, architectural ceiling fixture with visible design character in the entrance or corridor overhead.
