SH SARA HOSPITALITY

PRODUCT

BUILT-IN SEAT GRANITE SHOWER SURROUND

SHFFETSS002

DESCRIPTION

This Built-In Seat Shower Surround installs across the shower walls with an integrated bench seat built into one wall panel at a standard seating height, providing a fixed, waterproof seat surface within the shower enclosure without a separate seat unit or additional installation. Covering the full height of the shower walls with the built-in seat integrated into the panel system, it suits hotel guestroom accessible shower installations, ADA-compliant hospitality suite bathroom fit-outs, and upscale property shower renovations where a surround with a built-in seat delivers a permanent, integrated seating position within the shower without a bolt-on or freestanding seat addition.
