PRODUCT

DUAL WALL GRANITE SHOWER SURROUND

SHFFETSS003

DESCRIPTION

This Dual Wall Shower Surround installs across two adjacent shower walls in an alcove or walk-in shower configuration, covering both the back wall and one side wall with a continuous panel surface and a clean finished edge at the open shower side. Covering the full height of both walls from the floor threshold upward, it suits hotel guestroom two-wall shower installations, boutique hospitality suite walk-in shower fit-outs, and bathroom renovation projects where a two-wall panel surround delivers a clean, grout-free surface across the primary shower walls without full enclosure panel coverage.
